

Simple Apple Pie, Two Trays

Open shortcrust slab pie: pressed base, crumbs, apples. No lid, both trays baked together.

 20-24 pieces

 2 h 05 min

 Easy

 1 cook

1 ASSUMPTIONS

What I decided for you — override anything here

 Two flat oven trays, about 30 x 40 cm
"2 oven plates" read as the AEG oven's own baking trays.
Smaller trays: keep dough back rather than building thicker.

 Dough pressed in, not rolled
Pressing skips rolling, chilling and flouring. If you prefer rolling, chill the dough 30 minutes first.

 Fan 180 C on two shelf levels
Fan heat is the only mode that bakes both trays evenly at once.
Fallback: 190 C conventional, one tray at a time.

 Vanilla as vanilla sugar
Rimi stocks vanilla sugar, not plain extract. Swap 16 g vanilla sugar for 2 tsp extract if you have it.

 Open pie, no top crust
"Not much layers" read as base plus filling only. Want a lid: keep back a third of the dough and add 10 minutes bake.

 AEG oven has dial functions, no program numbers
BE3002420M is a rotary-dial model. Select the True Fan Cooking symbol on the function dial, not a program number.

 Firm sour apples, weighed before peeling
Granny Smith or Antonovka hold their shape. Sweet soft apples: cut 5 mm and drop filling sugar to 110 g.

 TIMELINE

 CHECKPOINTS — ALL TRUE BEFORE MOVING ON

 Oven-ready · 0:58
Bases pressed and crumbed, filling tossed, oven at 180 C

 Bake check · 1:20
Swap trays top/bottom if browning differs

TOOLS AND PARTS

AEG oven

Bakes both trays at once, two levels

Fan 180 C, upper + lower third

True Fan Cooking symbol

Kenwood mixer

Weighs dry mix, rubs in cold butter

Speed 1-2, stop at clumps

5L bowl

K-beater

Spatula

Apple slicer

Cores and wedges apples in one press

Press, then cut wedges to 4-5 mm

12-wedge
press

Kitchen scale

Weighs apples and filling off the mixer

Grams, tare between items

INGREDIENTS

plain flour

700 g dough

cold butter

350 g 1-2 cm cubes

white sugar

140 g dough

baking powder

12 g dough

fine salt

6 g dough

eggs

2 bind the dough

apples

2.4 kg weighed before peeling

brown sugar

150 g filling

ground cinnamon

10 g filling

ground nutmeg

3 g filling

vanilla sugar

16 g or 2 tsp extract

lemon juice

30 ml about 1 lemon

potato starch

40 g binds juices

breadcrumbs

60 g under the apples

3 STEPS

1 Weigh dry mix, cube butter

⌚ 8 min

* butter fridge-cold

plain flour

700 g

white sugar

140 g

baking powder

12 g

fine salt

6 g

cold butter

350 g

Weigh flour, sugar, baking powder and salt straight into the 5L bowl on the mixer's integrated scale, taring between each. Cube the butter last so it stays cold.

✓ Dry mix in the bowl, butter cubed and still firm.

Kenwood mixer

2 Mix shortcrust dough

⌚ speed 1-2

⌚ 8-10 min

cold butter

350 g

eggs

2

Beat the cold butter into the dry mix until it looks like damp sand with no butter lumps, then add the eggs and stop the moment the dough gathers into clumps. Over-mixing makes it tough.

✓ Holds together when squeezed, still crumbly.

Kenwood mixer

K-beater

3

Press bases into both trays

12 min

8 mm thick

breadcrumbs

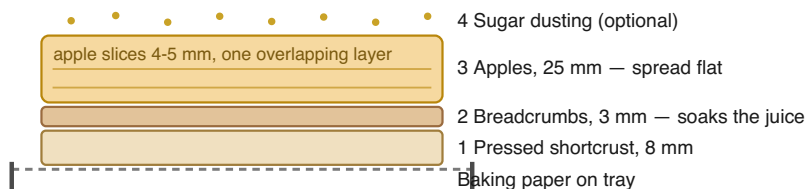

60 g

Line both trays with paper and press half the dough into each, about 8 mm thick with a 15 mm rim up the sides. Scatter the breadcrumbs over the base — they soak up the apple juice.

☑ Even base, raised rim all round, crumbs spread thin.

Tray cross-section — only 3 layers, no lid

Same build on both trays. Total height about 35 mm.

Edge

Press the dough 15 mm up the tray sides to make a rim that holds the juice in. No top crust, so no vents to cut — the apples brown in the open air.

4

Peel and slice apples

4-5 mm

20 min

apples

2.4 kg

Peel the apples, press each one through the slicer to core and wedge it in one go, then cut the wedges across into 4-5 mm slices. Thicker slices stay raw in the middle.

☑ About 2 kg of even slices, no core pieces left.

Apple slicer

12-wedge press

5 Toss the filling

⌚ 5 min

⌘ use straight away

brown sugar

150 g

ground cinnamon

10 g

ground nutmeg

3 g

vanilla sugar

16 g

lemon juice

30 ml

potato starch

40 g

Weigh brown sugar, cinnamon, nutmeg, vanilla sugar and potato starch onto the sliced apples, add the lemon juice and toss until every slice is coated. Fill the trays now, before the apples water out.

☑ Slices evenly coated, first juices showing.

Kitchen scale

6 Preheat the oven

🌀 fan 180 C

⌚ 15 min

≡ shelf 2 and 4

Turn the function dial to the True Fan Cooking symbol and set 180 C, with racks in the lower and upper third. Fallback if fan is unavailable: 190 C conventional, one tray at a time.

☑ Oven light off, temperature holding at 180 C.

AEG oven

7 Spread apples and bake

🌀 fan 180 C

⌚ 40-45 min

↻ swap at 22 min

apples

2.4 kg

Spread the tossed apples over both bases in one flat overlapping layer, right to the rim, and bake on both levels. Swap top and bottom trays at 22 minutes if one is browning faster.

☑ Edges golden, apple juices bubbling and thickened.

AEG oven

8 Cool, then slice

⌚ 25 min min

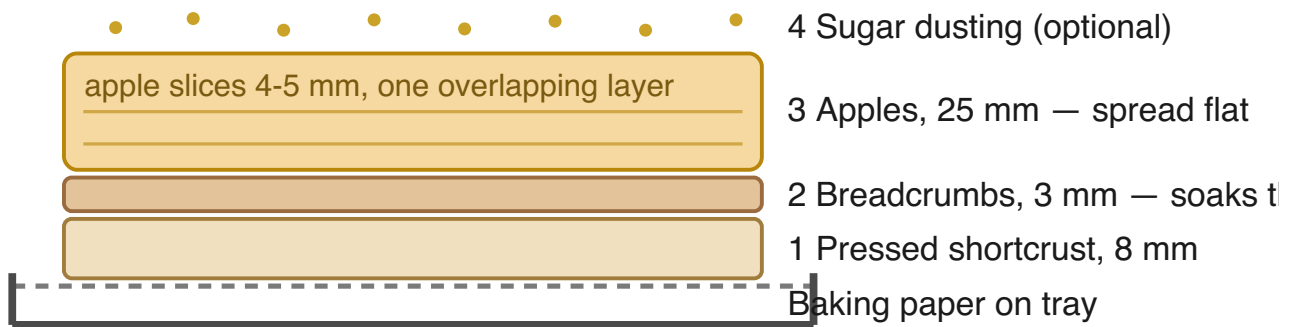

✂ 10-12 per tray

Leave the pie on its tray until the base has firmed up, then cut into squares. Cutting hot drags the filling out of the slices.

☑ Pieces lift clean, filling stays put.

Tray cross-section — only 3 layers, no lid

Same build on both trays. Total height about 35 mm.

Edge

Press the dough 15 mm up the tray sides to make a rim that holds the juice in.

No top crust, so no vents to cut — the apples brown in the open air.

Build order 1-4, identical on both trays.

⚠ Wash hands and bowls after raw egg

⚠ Cool fully, then refrigerate leftovers same day
