

Apple Pie - AEG BE3002420M

Classic double-crust apple pie adapted to the confirmed AEG Competence BE3002420M manual: Conventional Cooking, shelf position 1, 180 C, 70-90 min. The Kenwood KWL90.244SI handles the shortcrust dough, and the Adam apple slicer speeds up coring before final thin slicing.

8 generous slices

2 hr 35 min

Medium

1 ASSUMPTIONS

What I decided for you — override anything here

- One 20-22 cm pie dish or similar oven-safe dish is used.
- One cook is assumed.
- Firm tart-sweet apples are used; reduce filling sugar if the apples are very sweet.
- The AEG oven has no numbered programs for this recipe; use the named dial function Conventional Cooking.
- The manual text confirms voltage and functions, but not total wattage or a printed full oven temperature range.

2 REQUIRED

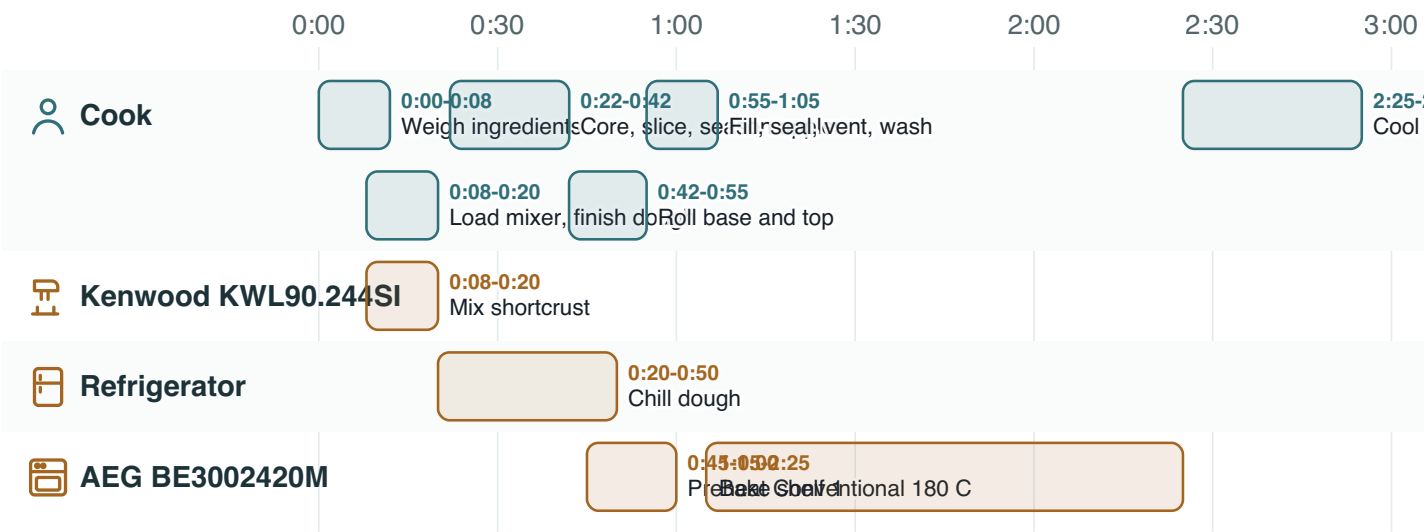

TIME

hands-on 0:50

unattended 1:35

2 hr 35 min

TIMELINE

CHECKPOINTS — ALL TRUE BEFORE MOVING ON

- Oven-ready · About 1 hr after start**
Dough is chilled and rolled, filling is mixed, pie is sealed and vented, and the AEG oven is at 180 C Conventional Cooking.
- Bake check · 70 min into baking**
If juices are not bubbling, continue baking in 10 min checks up to 90 min.

TOOLS AND PARTS

AEG Competence BE3002420M

to bake: one pie on the lower shelf using the manual's apple-pie guidance.

○ Conventional Cooking, shelf position 1, 180 C, 70-90 min

⬇ Wire shelf; pie dish

AEG BE3002420M function chart

shows the real oven-function symbols so the correct dial setting can be selected.

○ Use the Conventional Cooking row: two horizontal bars

⬇ Function selector dial

KitchenAid Titanium Chef Patissier XL KWL90.244SI

quickly rubs cold butter into flour and brings shortcrust dough together.

⚙ Low speed for butter; speed 1-2 only until dough clumps

⬇ 5 L stainless bowl or 7 L EasyWarm bowl; stainless K-beater

Adam B0D1V55NWQ apple slicer

Cores apples into 12 wedges before knife-slicing them thinner for even filling.

✂ Manual press tool, 12 wedges

⬇ Side handles

INGREDIENTS

🍷	plain wheat flour	350 g	plus extra for rolling
🍞	cold unsalted butter	225 g	1-2 cm cubes
📦	white sugar	35 g	for dough
🧂	fine salt	4 g	about 3/4 tsp
🥚	egg	1	for dough
🥛	sour cream or cold water	60-90 g	add only enough to bind
🍏	apples	1.1 kg	before peeling/coring
📦	brown sugar	80-110 g	to taste
⊕	lemon juice	20 ml	balances sweetness
🌿	ground cinnamon	6 g	about 2 tsp
🍲	potato starch or corn starch	25 g	binds juices
🍲	breadcrumbs or semolina	20 g	optional, under filling
🥚	egg	1	beaten for egg wash
📦	coarse sugar	15 g	optional topping

3 STEPS

1 Prepare cold dough ingredients

Cook

Worktop

Knife, scale, bowl

Keep butter cold

8 min

Flour, cold butter, dough sugar, salt, egg, sour cream or cold water

Cube the butter. Weigh flour, sugar, and salt. Keep butter cold until it goes into the mixer.

✔ Butter is cold and cubed; dry ingredients are weighed.

2 Mix shortcrust dough

Cook

Kenwood Titanium Chef Patissier XL KWL90.244SI

5 L stainless bowl or 7 L EasyWarm bowl; stainless K-beater

Low speed until sandy

speed 1-2 only until clumps form

10-12 min

Dry ingredients, cold butter, egg, sour cream or cold water

Mix flour, sugar, and salt. Add butter and mix until pea-sized. Add egg, then sour cream or cold water a spoonful at a time. Stop as soon as the dough clumps.

✔ Dough holds together when squeezed but is not smooth or warm.

Titanium Chef
Patissier XL
KWL90.244SI

3 Divide and chill

Cook

Refrigerator

Covered dough portions

Cold storage

30 min minimum

Dough, wrap or covered container

Divide dough into one larger base piece and one smaller top piece. Flatten into disks, cover, and chill.

✔ Dough is firm enough to roll without smearing butter.

4

Prepare apple filling

 Cook

○ Worktop

▽ Adam apple slicer, knife, large bowl

✍ Manual slicer: 12 wedges, then knife-slice to 3-5 mm

⌚ 20 min

↶ Apples, sugar, lemon juice, cinnamon, starch

Peel apples if desired. Core with the apple slicer, then cut wedges into thin slices. Toss with brown sugar, lemon juice, cinnamon, and starch.

☑ Apple slices are evenly coated and just starting to release juice.

5

Preheat AEG oven

 Cook

○ AEG Competence BE3002420M

▽ Wire shelf on shelf position 1

△ Conventional Cooking, 180 C

⌚ 15 min preheat

↶ AEG oven, wire shelf

Set the function dial to Conventional Cooking, the symbol with two horizontal bars. Set 180 C. Put the wire shelf on shelf position 1.

☑ Oven is fully preheated before the pie goes in.

Competence
BE3002420M

6

Assemble pie

 Cook

○ Worktop

▽ Pie dish, rolling pin, pastry brush

○ Roll base slightly larger than dish

✍ cut vents in top

⌚ 15-20 min

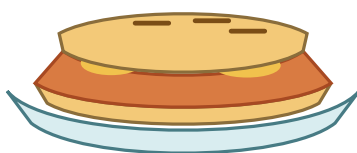

↶ Chilled dough, apple filling, breadcrumbs/semolina, egg wash

Roll the base and fit it into the dish. Sprinkle breadcrumbs or semolina if using. Add apples. Roll the top, cover, seal edges, cut vents, brush with beaten egg, and add coarse sugar if using.

☑ Top is sealed and vented; no large tears in the crust.

Apple Pie Assembly

Build from bottom to top. Keep the top vented so bubbling juices can escape.

- 5 Top crust, sealed and vented
- 4 Apple filling, lightly mounded
- 3 Starch and cinnamon mixed through fruit
- 2 Bottom crust, chilled and even
- 1 20-22 cm pie dish or similar oven dish

Bake on AEG Conventional Cooking, shelf 1, 180 C, until bubbling and deeply golden.

7

Bake

Cook

AEG Competence BE3002420M

Wire shelf, shelf position 1

Conventional Cooking, 180 C

70-90 min

Assembled pie

Bake on shelf position 1. Check at 70 min. If the rim browns too early, shield the edge loosely with foil while the centre finishes.

Crust is deep golden and apple juices bubble through the vents.

Competence
BE3002420M

8

Cool and slice

Cook

Counter

Knife, pie server

Room temperature

30 min minimum

60 min cleaner slices

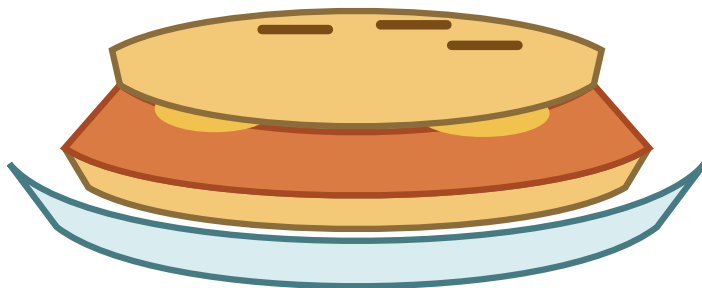

Baked pie, cooling rack or heatproof counter

Cool before cutting so the starch can set the apple juices.

Slices lift without the filling flooding out.

Apple Pie Assembly

Build from bottom to top. Keep the top vented so bubbling juices can escape.

- 5 Top crust, sealed and vented
- 4 Apple filling, lightly mounded
- 3 Starch and cinnamon mixed through
- 2 Bottom crust, chilled and even
- 1 20-22 cm pie dish or similar oven d

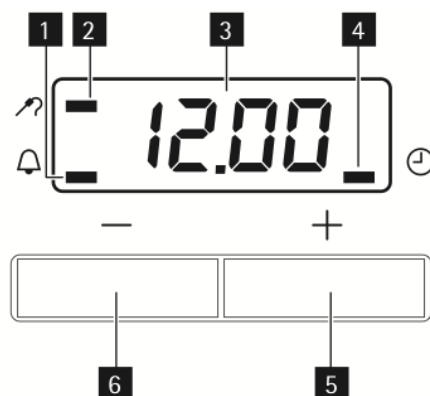

Bake on AEG Conventional Cooking, shelf 1, 180 C, until bubbling and deeply golden.

Layer order for a clean slice: dish, bottom crust, apples, top crust, vents.

Oven function		Application
	Pizza Setting	To bake on one oven level food with a more intensive browning and a crispy base. Decrease the oven temperatures (20-40 °C) compared with Conventional
	Conventional Cooking	To bake and roast on one oven level.
	Bottom Heat	To bake cakes with crispy or crusty bases and to preserve food
	Defrost	To defrost frozen food.
	Grilling	To grill flat food in the middle of the grill and to toast.
	Fast Grilling	To grill flat food in large quantities and to toast.
	Turbo Grilling	To roast larger joints of meat or poultry on one level. Also for browning food e.g. gratin.

Electronic programmer

- 1 Minute minder function indicator
- 2 Core temperature sensor indicator

- 5 Button "+"
- 6 Button "-"

CLOCK FUNCTIONS

Minute minder function

 This function does not affect oven operation.

Setting the minute minder function

1. Push the + or - button.
2. Set the time with + or - button (maximum time is 2 hours 30 minutes).
3. After 5 seconds the clock starts to count down.
4. When time finishes press any key to switch off the signal.

⚠ Wash hands, tools, and work surface after handling raw egg.

⚠ Cool leftovers, then refrigerate if keeping longer than the day of baking.

⚠ Reheat slices until hot throughout if serving later.
