

Apple Pie - AEG BE3002420M

Servings: 8 generous slices

Total time: 2 hr 35 min

Active time: 50-60 min

Passive time: 95 min chilling, baking, cooling

Difficulty: Medium

Classic double-crust apple pie adapted to the confirmed AEG Competence BE3002420M manual: Conventional Cooking, shelf position 1, 180 C, 70-90 min. The Kenwood KWL90.244SI handles the shortcrust dough, and the Adam apple slicer speeds up coring before final thin slicing.

Assumptions

- One 20-22 cm pie dish or similar oven-safe dish is used.
- One cook is assumed.
- Firm tart-sweet apples are used; reduce filling sugar if the apples are very sweet.
- The AEG oven has no numbered programs for this recipe; use the named dial function Conventional Cooking.
- The manual text confirms voltage and functions, but not total wattage or a printed full oven temperature range.

Appliance Plan

AEG Competence BE3002420M

AEG Competence BE3002420M

Use: Main bake: one pie on the lower shelf using the manual's apple-pie guidance.

Settings/program: Conventional Cooking, shelf position 1, 180 C, 70-90 min

Accessory: Wire shelf; pie dish

AEG BE3002420M function chart

Check functions	
	Conventional Cooking: To bake with conventional heating. To bake with top and bottom heating, set the oven to 200°C and use the top and bottom heating function.
	Bottom Heat: To bake cakes with deep or wide bases and to prevent heat.
	Defrost: To defrost frozen food.
	Grill: To grill food in the middle of the grill and to toast.
	Fast Grilling: To grill food in large quantities and to toast.
	Auto Defrost: To melt frozen parts of meat or poultry on one level. Also for defrosting frozen goods.

Electronic programmer	
	Electronic programmer function indicator
	Clock indicator
	Time and mode indicator
	Button <

CLOCK FUNCTIONS

Minute minder function

- The function does not affect oven operation.
- Setting the minute minder function:
1. Push the < or > button.
 2. Set the time with < or > button (maximum time is 2 hours 59 minutes).
 3. After 5 seconds the clock starts to count down.
 4. When time has elapsed press the < or > button to stop the signal.

AEG BE3002420M function chart

Use: Shows the real oven-function symbols so the correct dial setting can be selected.

Settings/program: Use the Conventional Cooking row: two horizontal bars

Accessory: Function selector dial

Kenwood Titanium Chef Patissier XL KWL90.244SI

Kenwood Titanium Chef Patissier XL KWL90.244SI

Use: Quickly rubs cold butter into flour and brings shortcrust dough together.

Settings/program: Low speed for butter; speed 1-2 only until dough clumps

Accessory: 5 L stainless bowl or 7 L EasyWarm bowl; stainless K-beater

Adam B0D1V55NWQ apple slicer

Adam B0D1V55NWQ apple slicer

Use: Cores apples into 12 wedges before knife-slicing them thinner for even filling.

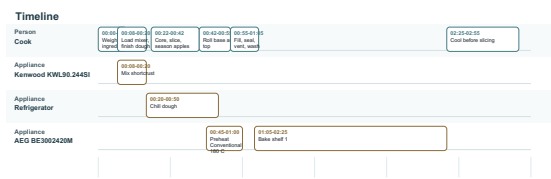

Settings/program: Manual press tool, 12 wedges

Accessory: Side handles

Ingredients

Amount	Ingredient	Notes
350 g	plain wheat flour	plus extra for rolling
225 g	cold unsalted butter	1-2 cm cubes
35 g	white sugar	for dough
4 g	fine salt	about 3/4 tsp
1	egg	for dough
60-90 g	sour cream or cold water	add only enough to bind
1.1 kg	apples	before peeling/coring
80-110 g	brown sugar	to taste
20 ml	lemon juice	balances sweetness
6 g	ground cinnamon	about 2 tsp
25 g	potato starch or corn starch	binds juices
20 g	breadcrumbs or semolina	optional, under filling
1	egg	beaten for egg wash
15 g	coarse sugar	optional topping

Pie Layering

Apple Pie Assembly

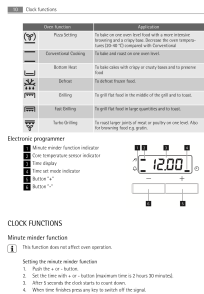

Build from bottom to top. Keep the top vented so bubbling juices can escape.

Bake on AEG Conventional Cooking, shelf 1, 180 C, until bubbling and deeply golden.

Note: Layer order for a clean slice: dish, bottom crust, apples, top crust, vents.

AEG Dial Reference

Note: Use Conventional Cooking for this single pie: the symbol with two horizontal bars.

Method

1. Prepare cold dough ingredients

Prepare cold dough ingredients

Cook: Cook

Need: Flour, cold butter, dough sugar, salt, egg, sour cream or cold water

Tool: Worktop; Knife, scale, bowl

Set: Keep butter cold; 8 min

Do: Cube the butter. Weigh flour, sugar, and salt. Keep butter cold until it goes into the mixer.

Done: Butter is cold and cubed; dry ingredients are weighed.

2. Mix shortcrust dough

Mix shortcrust dough

Cook: Cook

Need: Dry ingredients, cold butter, egg, sour cream or cold water

Tool: Kenwood Titanium Chef Patissier XL KWL90.244SI; 5 L stainless bowl or 7 L EasyWarm bowl; stainless K-beater

Set: Low speed until sandy; speed 1-2 only until clumps form; 10-12 min

Do: Mix flour, sugar, and salt. Add butter and mix until pea-sized. Add egg, then sour cream or cold water a spoonful at a time. Stop as soon as the dough clumps.

Done: Dough holds together when squeezed but is not smooth or warm.

3. Divide and chill

Divide and chill

Cook: Cook

Need: Dough, wrap or covered container

Tool: Refrigerator; Covered dough portions

Set: Cold storage; 30 min minimum

Do: Divide dough into one larger base piece and one smaller top piece. Flatten into disks, cover, and chill.

Done: Dough is firm enough to roll without smearing butter.

4. Prepare apple filling

Prepare apple filling

Cook: Cook

Need: Apples, sugar, lemon juice, cinnamon, starch

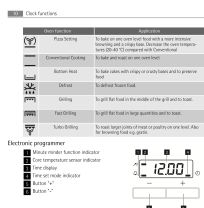

Tool: Worktop; Adam apple slicer, knife, large bowl

Set: Manual slicer: 12 wedges, then knife-slice to 3-5 mm; 20 min

Do: Peel apples if desired. Core with the apple slicer, then cut wedges into thin slices. Toss with brown sugar, lemon juice, cinnamon, and starch.

Done: Apple slices are evenly coated and just starting to release juice.

5. Preheat AEG oven

CLOCK FUNCTIONS
Minute-rotator function:
1. This function does not affect oven operation.
Setting the minute-rotator function:
1. Turn the minute-rotator.
2. Set the time with +/- buttons (maximum time is 2 hours 59 minutes).
3. After 15 seconds the clock display reappears.
4. When time reaches zero any key to switch off the display.

Preheat AEG oven

Cook: Cook

Need: AEG oven, wire shelf

Tool: AEG Competence BE3002420M; Wire shelf on shelf position 1

Set: Conventional Cooking, 180 C; 15 min preheat

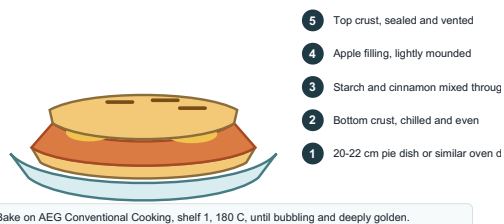

Do: Set the function dial to Conventional Cooking, the symbol with two horizontal bars. Set 180 C. Put the wire shelf on shelf position 1.

Done: Oven is fully preheated before the pie goes in.

6. Assemble pie

Apple Pie Assembly

Build from bottom to top. Keep the top vented so bubbling juices can escape.

Assemble pie diagram

Cook: Cook

Need: Chilled dough, apple filling, breadcrumbs/semolina, egg wash

Tool: Worktop; Pie dish, rolling pin, pastry brush

Set: Roll base slightly larger than dish; cut vents in top; 15-20 min

Do: Roll the base and fit it into the dish. Sprinkle breadcrumbs or semolina if using. Add apples. Roll the top, cover, seal edges, cut vents, brush with beaten egg, and add coarse sugar if using.

Done: Top is sealed and vented; no large tears in the crust.

7. Bake

Bake

Cook: Cook

Need: Assembled pie

Tool: AEG Competence BE3002420M; Wire shelf, shelf position 1

Set: Conventional Cooking, 180 C; 70-90 min

Do: Bake on shelf position 1. Check at 70 min. If the rim browns too early, shield the edge loosely with foil while the centre finishes.

Done: Crust is deep golden and apple juices bubble through the vents.

8. Cool and slice

Cook: Cook

Need: Baked pie, cooling rack or heatproof counter

Tool: Counter; Knife, pie server

Set: Room temperature; 30 min minimum; 60 min cleaner slices

Do: Cool before cutting so the starch can set the apple juices.

Done: Slices lift without the filling flooding out.

Sync Points

Point	When	Readiness criteria
Oven-ready	About 1 hr after start	Dough is chilled and rolled, filling is mixed, pie is sealed and vented, and the AEG oven is at 180 C Conventional Cooking.
Bake check	70 min into baking	If juices are not bubbling, continue baking in 10 min checks up to 90 min.

Food Safety

- Wash hands, tools, and work surface after handling raw egg.
- Cool leftovers, then refrigerate if keeping longer than the day of baking.
- Reheat slices until hot throughout if serving later.
