

Apple Pie for Two Oven Trays

Apple Pie for Two Oven Trays

Servings: 20-24 pieces, from two standard oven trays

Total time: 2 hr 10 min

Active time: 55-65 min

Passive time: 65-75 min chilling and baking

Difficulty: Medium

A two-tray apple slab pie scaled for your AEG Competence built-in oven. The plan uses the Kenwood Titanium Chef Patissier XL or Kenwood Cooking Chef for dough mixing, then bakes both trays at once on fan/convection. Exact AEG model and program IDs are not confirmed, so settings are given as manual oven modes.

Assumptions

- Interpreted “two plates for my stove” as two flat oven trays/sheets.
- Oven trays are roughly 30 x 40 cm each; if smaller, keep extra dough/filling aside or make the pie slightly thicker.
- One cook is assumed. If several cooks are available, Cook A can make dough while Cook B peels and slices apples.
- AEG Competence exact model and program numbers are unconfirmed; use the fan/convection symbol for two-level baking.

Appliance Plan

AEG Competence built-in electric oven

AEG Competence built-in electric oven

Use: Bake both apple pie trays at the same time on two shelf levels.

Settings/program: Program ID not confirmed. Use Fan/Convection, 180 C, two levels, 35-45 min. Fallback: Top/bottom heat, 190 C, one tray at a time.

Accessory: Two oven trays/sheets lined with baking paper

Kenwood Titanium Chef Patissier XL KWL90.244SI or Kenwood Cooking Chef

Kenwood Titanium Chef Patissier XL KWL90.244SI or Kenwood Cooking Chef

Use: Rub butter into flour and bring the shortcrust dough together quickly without warming it by hand.

Settings/program: Use low speed for dry mixing, then speed 1-2 only until dough clumps. Exact accessory set not confirmed.

Accessory: Main bowl plus K-beater/paddle if available; otherwise use fingertips or pastry cutter by hand

Ingredients

Amount	Ingredient	Notes
900 g	plain wheat flour	For shortcrust dough
450 g	cold unsalted butter	Cut into 1-2 cm cubes
180 g	white sugar	For dough
16 g	baking powder	About 4 tsp
8 g	fine salt	About 1 1/2 tsp
4	eggs	For dough
200 g	sour cream or thick yogurt	Add just enough for dough to come together
2.4 kg	apples	Firm baking apples; weight before peeling/coring
160 g	brown or white sugar	For filling; adjust to apple sweetness
30 ml	lemon juice	Prevents browning and balances sweetness
12 g	ground cinnamon	About 4 tsp
50 g	potato starch or corn starch	Binds apple juices
80 g	breadcrumbs or semolina	Sprinkle under filling to absorb juice

Amount	Ingredient	Notes
1	egg	Beat for egg wash
30 g	coarse sugar	Optional topping

Timeline

Time	Cook	Task
00:00	Cook	Cube butter, measure dough ingredients, line two oven trays with baking paper.
00:10	Cook	Mix dough in Kenwood, divide into four portions, chill.
00:25	Cook	Peel, core, and slice apples; toss filling.
00:55	Cook	Start AEG oven preheat: Fan/Convection 180 C.
01:00	Cook	Roll bottoms, fill both trays, roll tops, vent and egg-wash.
01:25	Cook	Bake both trays. Swap/rotate halfway if browning differs.
02:05	Cook	Cool until sliceable; dust or portion.

Method

1. Prepare trays and cold ingredients

Cook: Cook

Appliance: Worktop

Accessory: Two oven trays, baking paper, rolling pin

Settings/program: No heat

Timing: 10 min

Line two oven trays with baking paper. Cube the cold butter and keep it cold while weighing the flour, dough sugar, baking powder, and salt.

Done when: Both trays are lined and all dough ingredients are measured.

2. Mix the shortcrust dough

Cook: Cook

Appliance: Kenwood Titanium Chef Patissier XL KWL90.244SI or Kenwood Cooking Chef

Accessory: Main bowl plus K-beater/paddle if available; otherwise mix by hand

Settings/program: Low speed until butter is pea-sized; speed 1-2 after eggs and sour cream, only until clumps form

Timing: 10-12 min

Mix flour, 180 g sugar, baking powder, and salt. Add cold butter and mix until sandy with pea-sized pieces. Add 4 eggs and 200 g sour cream/yogurt. Stop as soon as the dough clumps; do not knead smooth.

Done when: Dough holds together when squeezed but still looks short and slightly crumbly.

3. Divide and chill dough

Cook: Cook

Appliance: Refrigerator

Accessory: Wrap or covered container

Settings/program: Cold storage

Timing: 30 min minimum

Divide dough into four portions: two slightly larger bottom pieces and two smaller top pieces. Flatten each into a rectangle, cover, and chill.

Done when: Dough is firm enough to roll without smearing butter.

4. Prepare apple filling

Cook: Cook

Appliance: Worktop

Accessory: Large bowl, knife or slicer

Settings/program: No heat

Timing: 25-30 min

Peel and core 2.4 kg apples. Slice 3-5 mm thick. Toss with 160 g sugar, lemon juice, cinnamon, and starch.

Done when: Apples are evenly coated and starting to release a little juice.

5. Preheat the AEG oven

Cook: Cook

Appliance: AEG Competence built-in electric oven

Accessory: Two racks positioned in upper-middle and lower-middle levels

Settings/program: Program ID not confirmed; use Fan/Convection, 180 C. Fallback: Top/bottom heat, 190 C, one tray at a time.

Timing: 15-20 min preheat

Turn the oven to fan/convection at 180 C for two-level baking. If your oven has no fan setting or bakes unevenly, plan to bake one tray at a time using top/bottom heat at 190 C.

Done when: Oven is fully preheated before trays go in.

6. Assemble two trays

Cook: Cook

Appliance: Worktop

Accessory: Two lined oven trays, rolling pin

Settings/program: No heat

Timing: 20-25 min

Roll the two larger dough portions to fit the tray bases. Lay them into the trays and patch tears. Sprinkle each base with half the breadcrumbs or semolina. Divide apples between trays, leaving a narrow border.

Roll the two top pieces, place over the apples, seal edges, cut steam vents, brush with beaten egg, and sprinkle coarse sugar if using.

Done when: Both pies are sealed, vented, and ready to bake.

7. Bake both trays

Cook: Cook
Appliance: AEG Competence built-in electric oven
Accessory: Two oven trays on two rack levels
Settings/program: Fan/Convection 180 C, 35-45 min. Swap upper/lower trays and rotate front/back after 22 min if browning differs.
Timing: 35-45 min

Load both trays quickly to preserve oven heat. Bake until the tops are deep golden and apple juices bubble through the vents. If using top/bottom heat instead, bake one tray at a time on the middle shelf at 190 C for 35-45 min.

Done when: Pastry is golden underneath at the edges and filling bubbles visibly through vents.

8. Cool and slice

Cook: Cook
Appliance: Cooling rack or heatproof counter
Accessory: Knife, spatula
Settings/program: Room temperature
Timing: 30 min minimum

Cool the trays before slicing so the starch can set the apple juices. Slice each tray into 10-12 pieces.

Done when: Pieces lift cleanly and the filling does not run.

Sync Points

Point	When	Readiness criteria
Oven-ready assembly	After dough is chilled and apple filling is mixed	Both trays are rolled, filled, covered, vented, egg-washed, and the AEG oven has reached 180 C fan/convection.
Halfway bake check	About 22 min into baking	If the upper tray browns faster, swap tray positions and rotate each tray front to back.

Food Safety

- Use clean hands and boards after handling raw egg.
- Cool pies at room temperature, then refrigerate leftovers if keeping longer than the same day.
- Reheat slices until hot throughout if serving later.
