What I decided for you — override anything here

 Two flat oven trays, about 30 x 40 cm
"Two plates for my stove" read as oven trays. Smaller trays: keep dough back or build thicker.

 One cook, no helper
Timeline has a single person lane; appliances carry the parallel work.

 AEG Competence has no numbered programs
Owned oven is a mid/late-2000s rotary-dial model, exact type unknown (B3xxx/B4xxx/B5xxx). Set the function dial to the fan/convection symbol, not a program number.

 Fan 180 C on two shelf levels
Fan heat is the only mode that bakes both trays evenly at once. Fallback: 190 C top/bottom heat, one tray at a time.

 Firm baking apples, weighed before peeling
Soft eating apples collapse; if that is all you have, cut slices 5 mm and add 10 g extra starch.

 Sweetness tuned to sour apples
With sweet apples drop filling sugar to about 120 g.
